PERSONAL PROJECTS

• DOCTOR CONSULTANCY WEBSITE

Developed a comprehensive online platform facilitating seamless interaction between doctors and patients for consultation and appointment booking.

Utilized HTML, CSS, JavaScript, MySQL, Video Conferencing APIs, and Responsive Web Design Frameworks in the development of the Doctor Consultancy Website project.

• Netflix clone

This is a Netflix clone using HTML and CSS to recreate the familiar user interface. This static project aims to showcase fundamental web development skills.

• Employee Management System

Designed and developed a comprehensive Employee Management System to streamline HR processes and enhance organizational efficiency.

Utilized Java for backend development, implementing core functionalities such as employee record management, attendance tracking, and payroll processing.

Employed HTML, CSS, and JavaScript for building an intuitive user interface, allowing HR personnel to navigate seamlessly through system features.
